

Description

HSC-H2O is an innovative approach to making water-borne gun cleaner at a fraction of the cost of conventional methods. Water-borne gun cleaners are primarily water, often as high as 90% water, so why pay for all that water when you already have your own supply? HSC-H2O is a concentrate of the “Active Ingredients” commonly found in gun cleaner solutions to help loosen soiled paint from your spray equipment and rinse clean. Mixes easily with 2.75 gallons of water to create a cleaner compliant in all 50 states.

Components

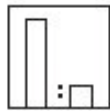

- HSC-H2O
- Water

HSC-H2O Waterborne Gun Wash Concentrate
Tap water typically works well.

Typical Uses

HSC-H2O is commonly used for cleaning application and mixing equipment prior to and after spray. May also be used as a shop clean up fluid in some instances. Not to be used alone (undiluted) for gun clean up.

Mix Ratio

For a gun wash compliant in all 50 U.S. states mix 1 quart of HSC-H2O with 2.75 gallons of water or 11 ounces of water for every one ounce of HSC-H2O. Helps loosen and remove water-borne paints before they dry.

Cleaning

Clean equipment immediately after use with properly mixed HSC-H2O blend. Once paint has dried HSC-H2O is less likely to work. Dispose of all waste according to local regulations.

Read MSDS of all components before using. Use proper personal protective equipment at all times. For use by professionally trained painters. **KEEP OUT OF REACH OF CHILDREN.** Bayou Innovations, LLC warrants that its products are free from defects at time of shipping.
